FEMORA - The Connected Story Behind Your Health

• Proposed Solution-

FEMALE HEALTH

Idea:

Connect scattered health records into one personal health story.

Solution:

AI-powered longitudinal timeline that connects symptoms, tests, treatments, and patterns.

Prototype:

Timeline • Report Upload • AI Summary • Pattern Detection • Skin Analysis

MALE WELLNESS

Idea:

Help men understand and improve unhealthy habits and recurring urges.

Solution:

AI-powered habit management that identifies triggers and provides personalized alternatives and motivation.

Prototype:

AI Chatbot • Streaks • Trigger Detection • Activity Suggestions • Goals • Wellness Tracking

TECHNICAL APPROACH

Binary
Brains

Feasibility

- **Software-Only:** No specialized hardware required.
- **Scalable Architecture:** Uses Firebase and Cloud Storage for easy scaling.
- **Modular AI System:** Male and Female modules can be developed independently.
- **Cloud-Based:** Easy to access, scale, and deploy.
- **Safe Testing:** Uses synthetic medical records during development.

Key Challenges

- **Data Privacy:** Sensitive health data needs strong protection.
- **AI Accuracy:** AI may give incorrect or misleading interpretations.
- **User Trust:** Users need confidence in security and results.
- **Incomplete Records:** Missing information may lead to false conclusions.
- **Medical Interpretation:** AI cannot replace professional medical diagnosis.

Our Approach

- **Secure Data:** Encryption and secure authentication protect user data.
- **AI as Support:** AI assists users, not as a medical diagnosis tool.
- **Document Priority:** Uploaded medical documents are given higher importance.
- **Confidence Alerts:** Shows confidence scores and suggests medical consultation when needed.

IMPACT AND BENEFITS

Men: Understand triggers, build healthy habits, stay motivated, and get AI-based emotional support.

Women: Keep a complete health history, connect symptoms over time, and identify patterns to discuss with doctors.

Key Benifits:

- Connected Data — One health view
- AI Insights — Personalized guidance
- Health Tracking — Track over time
- Pattern Discovery — Spot trends
- Emotional Support — Support when needed
